Long Stroke Pneumatic Powered Slides

- Magnetically coupled cylinder is designed to be leak free due to no mechanical connection between the piston and the body.
- Prelubricated for miles of maintenance-free travel, with easily accessible carriage lubrication port.
- 304 stainless steel tubing and U-cup seals for lower dynamic friction.
- Compact lightweight unit with built-in air cylinder.
- Linear ball bearings ride on precision ground and hardened shafting.
- Aluminum body and end blocks contain tapped holes for precision mounting or fixturing.
- Main body or end blocks can be anchored due to the 1/16" height difference.
